

# Armco Systems

Reliable and subtle security for any application.

## Benefits of using Armco Systems

Armco barrier systems offer a strong, cost-effective solution for protecting people, vehicles, and property in high-risk areas. Made from galvanized steel, they provide excellent impact resistance and long-lasting durability with minimal maintenance. Their modular design allows for quick installation and easy adaptation to various environments, including warehouses, car parks, and industrial sites – all while meeting UK safety standards for peace of mind.

- ✓ High-Quality Materials
- ✓ Rust-resistant design
- ✓ Versatile Applications
- ✓ Long-lasting
- ✓ Quick, simple installation
- ✓ Lightweight and easy to handle

## We Sell Fencing

At We Sell Fencing, we supply high-quality Armco barrier systems designed to deliver reliable protection in demanding environments. Whether for warehouses, car parks, industrial sites, or roadside applications, our Armco solutions combine strength, durability, and ease of installation. Manufactured to meet UK safety standards, our range includes beams, posts, and accessories – all engineered to provide long-term impact resistance and peace of mind. With expert support and fast turnaround times, We Sell Fencing is your trusted partner for Armco safety systems.

# Armco Systems

Reliable and subtle security for any application.

## Armco Pedestrian End

The Armco Pedestrian End enhances barrier systems by providing safety and aesthetic appeal. Its rounded edges and smooth finish minimize sharp corners, making it suitable for high foot traffic areas like car parks and retail parks. This component reduces injury risk while maintaining the structural integrity of the Armco system, promoting a pedestrian-friendly environment.

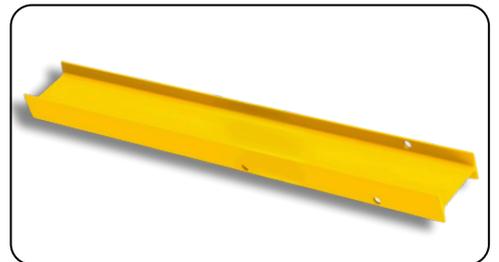

## Armco Z Post

The Armco Z Post is a lightweight, versatile, and easy-to-install support option suitable for low to medium impact applications. Its Z-shaped profile offers a strong, economical solution for car parks, warehouses, and agricultural settings. Made from galvanized steel, it provides long-term corrosion resistance, ensuring stability while minimizing installation time and costs.

## Armco RSJ Post Dig In

The RSJ Dig In Post is designed for heavy-duty performance in high-impact areas. It anchors deeply into the ground, offering excellent resistance to vehicle collisions, making it suitable for roadside protection and industrial sites. Made from galvanized steel, it ensures strength, durability, and long-term safety.

## Armco Two Wave Fishtail Ends

The Two Wave Fishtail End enhances Armco barriers by providing a smooth, flared termination that improves safety and aesthetics. Its rounded design reduces risks to pedestrians and vehicles by eliminating sharp edges. Ideal for public spaces, car parks, and pedestrian areas, it ensures a clean and professional finish while maintaining safety compliance.

## Armco RSJ Post Base Plated

The RSJ Base Plated Post is an ideal surface-mounted solution for locations where excavation isn't feasible. With a welded base plate, it can be securely bolted to concrete or hard surfaces, providing strong support with minimal disruption. It's suitable for urban, industrial, and warehouse settings, combining the strength of a dig-in post with the convenience of a fixed base.

**Material:** Hot Dip Galv

**Post Types:** Dig-In & Bolt Down

**Optional Finish:**
